

# e-Clock 2000

DJTECH.NET Develops industry first plug-n-play internet enabled alarm clock, e-Clock 2000

"The Best New E-nabled Product of 2000!" – e-World 2000

e-World - NJ December 1,2000 : DJTECH.NET, a division of 6for6 Group Inc, today pre-announced its new e-Clock 2000. With an estimated street price of \$899, the e-clock 2000 is bound to be clearing store shelves this holiday season. E-Clock 2000 is plug-n-play ready, no hard setups to confuse loved ones on Christmas morning. E-Clock offers scaleable support for 56 modems, Cable, DSL, T1\* and T3\* (Q2 2001). Based upon the now less popular Motorola 80386 processor chip, e-clock amazing surpasses the accuracy (of calculating time) than most of today's Pentium based processors. Sleep with the security of knowing you will be on time! No more guessing whether the alarm will go off, with 9volt backup support, your alarms are always on.

Future upgrades available summer 2001

- Microsoft Net-Meeting 3.01 e-Support Module
- Palm Pilot / Microsoft Outlook Scheduler e-Support Module
